ELSEVIER

Applied Surface Science 103 (1996) 541–552

applied surface science

Subject index

Alkali metals

Improvement of Cs-induced surface roughness for high depth resolution profiling of CdZnSe/ZnSe multilayer films, C. Takakuwa, M. Tomita, T. Hatanaka, I. Suzuki, G. Franco and H. Yamaguchi 103 (1996) 255

Activation of the Na_2KSb photocathode with Cs and O_2 at lowered temperatures, B. Erjavec 103 (1996) 343

The analysis of surface-adsorbed organic molecules by alkali-assisted MIES combined with UPS(He I), J. Günster, D. Ochs, S. Dieckhoff and V. Kempter 103 (1996) 351

A study of SO_2 interaction with sodium carbonates by X-ray photoelectron spectroscopy, K. Stejskalová, I. Spirovová, E. Lippert, K. Mocek and Z. Bastl 103 (1996) 509

Alloys

XPS/GIXS studies of thin oxide films formed on Fe–Cr alloys, T. Kosaka, S. Suzuki, H. Inoue, M. Saito, Y. Waseda and E. Matsubara 103 (1996) 55

Electrodeposition and characterization of tin–zinc alloy coatings, O.A. Ashiru and J. Shirokoff 103 (1996) 159

An XPS/SEM/EDX study of the early oxidation stages of the Fe–19Cr–5Al(+Y) alumina-forming alloys, J. Jedliński, A. Glazkov, M. Konopka, G. Borchardt, E. Tscherkasova, M. Bronfin and M. Nocuń 103 (1996) 205

N^+-implantation induced enhanced adhesion in WC_{1-x}/Ti–6Al–4V, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315

The validity of C1s charge referencing in the XPS of oxidised Al–Si alloys, C.R. Werrett, A.K. Bhattacharya and D.R. Pyke 103 (1996) 403

Preparation of well-defined samples of AlPdMn quasicrystals for surface studies, C.J. Jenks, D.W. Delaney, T.E. Bloomer, S.-L. Chang, T.A. Lograsso, Z. Shen, C.-M. Zhang and P.A. Thiel 103 (1996) 485

Effect of the surface segregation of chromium on oxidation of high-purity Fe–Cr alloys at room temperature, S. Suzuki, T. Kosaka, H. Inoue, M. Isshiki and Y. Waseda 103 (1996) 495

Aluminium

An XPS/SEM/EDX study of the early oxidation stages of the Fe–19Cr–5Al(+Y) alumina-forming alloys, J. Jedliński, A. Glazkov, M. Konopka, G. Borchardt, E. Tscherkasova, M. Bronfin and M. Nocuń 103 (1996) 205

Photon energy dependence of synchrotron radiation induced growth suppression and initiation in Al chemical vapor deposition. II. Surface analysis by Auger electron spectroscopy, I. Nishiyama and F. Uesugi 103 (1996) 299

N^+-implantation induced enhanced adhesion in WC_{1-x}/Ti–6Al–4V, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315

The validity of C1s charge referencing in the XPS of oxidised Al–Si alloys, C.R. Werrett, A.K. Bhattacharya and D.R. Pyke 103 (1996) 403

Preparation of well-defined samples of AlPdMn quasicrystals for surface studies, C.J. Jenks, D.W. Delaney, T.E. Bloomer, S.-L. Chang, T.A. Lograsso, Z. Shen, C.-M. Zhang and P.A. Thiel 103 (1996) 485

Aluminium oxide

Surfactant induced growth of thin gallium films on an insulating (sapphire) substrate, T. Lewowski, H. Otop and P. Wieczorek 103 (1996) 35

The interface between sputter-deposited gold thin films and ion-bombarded sapphire substrates, J.W. Park, A.J. Pedraza and W.R. Allen 103 (1996) 39

Surface enhanced Raman scattering from a ternary catalyst $Cu/ZnO/Al_2O_3$ under reaction conditions, P. Petersen and W. Krasser 103 (1996) 91
Auger electron depth profiling of the Cr/Al_2O_3 metallization system, H. Lu, Y.D. Cui, J. Qin, C.L. Bao and D.H. Shen 103 (1996) 113

Annealing

The behavior of the surface charge density in $Hg_xCd_{1-x}Te$ epilayers due to hydrogenation and annealing, M.S. Han, J.H. Beak, Y.T. Oh, T.W. Kang, T.W. Kim and J.I. Choi 103 (1996) 183
Influence of the rapid thermal annealing in vacuum on the XPS characteristics of thin SiO_2, E. Atanassova and A. Paskaleva 103 (1996) 359

Argon

Thermal regrowth of Si(100) damaged by Ne, Ar, and Xe ion bombardment, G. Petõ and J. Kanski 103 (1996) 459

Atomic force microscopy

AFM measurements of the topography and the roughness of ECR plasma treated polypropylene, M. Collaud Coen, G. Dietler, S. Kasas and P. Gröning 103 (1996) 27
An AFM investigation of the deposition of nanometer-sized rhodium and copper clusters by spin coating, A. Partridge, S.L.G. Toussaint and C.F.J. Flipse 103 (1996) 127
Improvement of Cs-induced surface roughness for high depth resolution profiling of CdZnSe/ZnSe multilayer films, C. Takakuwa, M. Tomita, T. Hatanaka, I. Suzuki, G. Franco and H. Yamaguchi 103 (1996) 255
Influence of saccharin on the structure and corrosion resistance of electrodeposited Cu/Ni multilayers, M. Troyon and L. Wang 103 (1996) 517
A novel structure observed on the phospholipid Langmuir–Blodgett bilayer by atomic force microscopy, Yuan Chunbo, Wu Ying, Yang Xiaomin, Lu Zuhong and Liu Juzheng 103 (1996) 531

Auger electron spectroscopy

The interface between sputter-deposited gold thin films and ion-bombarded sapphire substrates, J.W. Park, A.J. Pedraza and W.R. Allen 103 (1996) 39
Interaction of mercury vapour with thin films of gold, C. Battistoni, E. Bemporad, A. Galdikas, S. Kačiulis, G. Mattogno, S. Mickevičius and V. Olevano 103 (1996) 107
Auger electron depth profiling of the Cr/Al_2O_3 metallization system, H. Lu, Y.D. Cui, J. Qin, C.L. Bao and D.H. Shen 103 (1996) 113
Electron spectroscopy of carbonaceous materials, G.C. Smith and P.J. Shuff 103 (1996) 199
Study of the occupied electronic density of states of carbon samples by using second derivative carbon KVV Auger spectra, J.C. Lascovich and A. Santoni 103 (1996) 245
Characterization of hard amorphous carbon films deposited with high-energy ion beams, R.G. Pregliasco, G. Zampieri, H. Huck, E.B. Halac, M.A.R. de Benyacar and R. Righini 103 (1996) 261
Photon energy dependence of synchrotron radiation induced growth suppression and initiation in Al chemical vapor deposition. II. Surface analysis by Auger electron spectroscopy, I. Nishiyama and F. Uesugi 103 (1996) 299
N^+-implantation induced enhanced adhesion in $WC_{1-x}/Ti–6Al–4V$, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315
Preparation of well-defined samples of AlPdMn quasicrystals for surface studies, C.J. Jenks, D.W. Delaney, T.E. Bloomer, S.-L. Chang, T.A. Lograsso, Z. Shen, C.-M. Zhang and P.A. Thiel 103 (1996) 485

Beryllium

Sub-monolayer coverages of Be grown on GaAs(001)-c(4 × 4) and (2 × 4)-β by molecular beam epitaxy studied by reflectance anisotropy spectroscopy and reflection high-energy electron diffraction, K.C. Rose, D.A. Woolf, S.J. Morris, D.I. Westwood, R.H. Williams and W. Richter 103 (1996) 71

Boron

Structure of the B/Si(100) surface at low boron coverage studied by scanning tunnelling microscopy, M.A. Kulakov, Z. Zhang, A.V. Zotov, B. Bullemer and I. Eisele 103 (1996) 443

Cadmium

The behavior of the surface charge density in $Hg_xCd_{1-x}Te$ epilayers due to hydro-

genation and annealing, M.S. Han, J.H. Beak, Y.T. Oh, T.W. Kang, T.W. Kim and J.I. Choi 103 (1996) 183
Improvement of Cs-induced surface roughness for high depth resolution profiling of CdZnSe/ZnSe multilayer films, C. Takakuwa, M. Tomita, T. Hatanaka, I. Suzuki, G. Franco and H. Yamaguchi 103 (1996) 255

Carbides

N^+-implantation induced enhanced adhesion in WC_{1-x}/Ti–6Al–4V, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315

Carbon

Electron spectroscopy of carbonaceous materials, G.C. Smith and P.J. Shuff 103 (1996) 199
Study of the occupied electronic density of states of carbon samples by using second derivative carbon KVV Auger spectra, J.C. Lascovich and A. Santoni 103 (1996) 245
Characterization of hard amorphous carbon films deposited with high-energy ion beams, R.G. Pregliasco, G. Zampieri, H. Huck, E.B. Halac, M.A.R. de Benyacar and R. Righini 103 (1996) 261

Carbon monoxide

Rhythmic chemical reaction of CO on the surface of a SnO_2 gas sensor, S. Nakata, Y. Kato, Y. Kaneda and K. Yoshikawa 103 (1996) 369

Chemical vapour deposition

Investigation of the silicon-plasma silicon nitride interface with in situ transient photoconductivity measurements, J.R. Elmiger and M. Kunst 103 (1996) 11
Photon energy dependence of synchrotron radiation induced growth suppression and initiation in Al chemical vapor deposition. II. Surface analysis by Auger electron spectroscopy, I. Nishiyama and F. Uesugi 103 (1996) 299
Mechanisms of suboxide growth and etching in atomic layer deposition of tantalum oxide from $TaCl_5$ and H_2O, J. Aarik, K. Kukli, A. Aidla and L. Pung 103 (1996) 331

Chromium

XPS/GIXS studies of thin oxide films formed on Fe–Cr alloys, T. Kosaka, S. Suzuki, H. Inoue, M. Saito, Y. Waseda and E. Matsubara 103 (1996) 55
Auger electron depth profiling of the Cr/Al_2O_3 metallization system, H. Lu, Y.D. Cui, J. Qin, C.L. Bao and D.H. Shen 103 (1996) 113
An XPS/SEM/EDX study of the early oxidation stages of the Fe–19Cr–5Al(+Y) alumina-forming alloys, J. Jedliński, A. Glazkov, M. Konopka, G. Borchardt, E. Tscherkasova, M. Bronfin and M. Nocuń 103 (1996) 205
Nondestructive depth profiling of oxidized Fe–Cr alloy by the glancing-incidence and -takeoff X-ray fluorescence method, K. Tsuji and K. Hirokawa 103 (1996) 451
Effect of the surface segregation of chromium on oxidation of high-purity Fe–Cr alloys at room temperature, S. Suzuki, T. Kosaka, H. Inoue, M. Isshiki and Y. Waseda 103 (1996) 495

Clusters

Ab initio study of interaction between the OH hydroxyl and Pt_n ($n = 1–10$) clusters, W.-X. Xu, K.D. Schierbaum and W. Goepel 103 (1996) 279

Computer simulations

Ab initio study of interaction between the OH hydroxyl and Pt_n ($n = 1–10$) clusters, W.-X. Xu, K.D. Schierbaum and W. Goepel 103 (1996) 279

Copper

Surface enhanced Raman scattering from a ternary catalyst $Cu/ZnO/Al_2O_3$ under reaction conditions, P. Petersen and W. Krasser 103 (1996) 91
An AFM investigation of the deposition of nanometer-sized rhodium and copper clusters by spin coating, A. Partridge, S.L.G. Toussaint and C.F.J. Flipse 103 (1996) 127
Photoemission studies on $Cu(In, Ga)Se_2$ thin films and related binary selenides, D. Schmid, M. Ruckh and H.W. Schock 103 (1996) 409
Photoemission optogalvanic studies with copper as target electrode, K.C. Ajithprasad, V.P.N. Nampoori and C.P.G. Vallabhan 103 (1996) 465
The influence of modifying additions of La and Ce oxides on electronic state of surface atoms and ions of supported copper, A.N. Pestryakov and A.A. Davydov 103 (1996) 479

Influence of saccharin on the structure and corrosion resistance of electrodeposited Cu/Ni multilayers, M. Troyon and L. Wang 103 (1996) 517

Corrosion

Electrodeposition and characterization of tin–zinc alloy coatings, O.A. Ashiru and J. Shirokoff 103 (1996) 159
Investigations of the pitting corrosion behavior of passive film on REBAR electrodes containing 'artificial pit' in simulated cement solutions, X.G. Chen, Y. Yang, Z.G. Lin, W. Chu, Y.X. Shi and B.M. Wei 103 (1996) 189
Influence of saccharin on the structure and corrosion resistance of electrodeposited Cu/Ni multilayers, M. Troyon and L. Wang 103 (1996) 517

Depth profiling

SNMS characterization of ion irradiated GaAs surfaces, A. Scandurra, A. Licciardello, A. Torrisi, R. Weigert and O. Puglisi 103 (1996) 19
XPS/GIXS studies of thin oxide films formed on Fe–Cr alloys, T. Kosaka, S. Suzuki, H. Inoue, M. Saito, Y. Waseda and E. Matsubara 103 (1996) 55
Auger electron depth profiling of the Cr/Al_2O_3 metallization system, H. Lu, Y.D. Cui, J. Qin, C.L. Bao and D.H. Shen 103 (1996) 113
N^+-implantation induced enhanced adhesion in WC_{1-x}/Ti–6Al–4V, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315
Nondestructive depth profiling of oxidized Fe–Cr alloy by the glancing-incidence and -takeoff X-ray fluorescence method, K. Tsuji and K. Hirokawa 103 (1996) 451
Sputtering induced roughening effects on ion beam profiling of multilayers, A. Galdikas, L. Pranevičius and C. Templier 103 (1996) 471

Deuterium

Molecular and atomic deuterium chemisorption on thin gold films at 78 K: an isotope effect, L. Stobiński 103 (1996) 503

Electrical properties

Rhythmic chemical reaction of CO on the surface of a SnO_2 gas sensor, S. Nakata, Y. Kato, Y. Kaneda and K. Yoshikawa 103 (1996) 369

Electron diffraction

Sub-monolayer coverages of Be grown on GaAs(001)-c(4 × 4) and (2 × 4)-β by molecular beam epitaxy studied by reflectance anisotropy spectroscopy and reflection high-energy electron diffraction, K.C. Rose, D.A. Woolf, S.J. Morris, D.I. Westwood, R.H. Williams and W. Richter 103 (1996) 71
Point defect–dislocation loop behavior in Si with a $TiSi_2$ film, S.B. Herner, V. Krishnamoorthy and K.S. Jones 103 (1996) 377

Electron energy loss spectroscopy

Characterization of hard amorphous carbon films deposited with high-energy ion beams, R.G. Pregliasco, G. Zampieri, H. Huck, E.B. Halac, M.A.R. de Benyacar and R. Righini 103 (1996) 261

Electron microscopy

Interaction of mercury vapour with thin films of gold, C. Battistoni, E. Bemporad, A. Galdikas, S. Kačiulis, G. Mattogno, S. Mickevičius and V. Olevano 103 (1996) 107
An XPS/SEM/EDX study of the early oxidation stages of the Fe–19Cr–5Al(+Y) alumina-forming alloys, J. Jedliński, A. Glazkov, M. Konopka, G. Borchardt, E. Tscherkasova, M. Bronfin and M. Nocuń 103 (1996) 205
Preparation of 'near' homogeneous samples for the analysis of matrix-assisted laser desorption/ionisation processes, D.A. Allwood, I.K. Perera, J. Perkins, P.E. Dyer and G.A. Oldershaw 103 (1996) 231
Improvement of Cs-induced surface roughness for high depth resolution profiling of CdZnSe/ZnSe multilayer films, C. Takakuwa, M. Tomita, T. Hatanaka, I. Suzuki, G. Franco and H. Yamaguchi 103 (1996) 255
N^+-implantation induced enhanced adhesion in WC_{1-x}/Ti–6Al–4V, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315
Point defect–dislocation loop behavior in Si with a $TiSi_2$ film, S.B. Herner, V. Krishnamoorthy and K.S. Jones 103 (1996) 377
The influence of modifying additions of La and Ce oxides on electronic state of surface atoms and ions of supported copper, A.N. Pestryakov and A.A. Davydov 103 (1996) 479
Influence of saccharin on the structure and corrosion resistance of electrodeposited Cu/Ni multilayers, M. Troyon and L. Wang 103 (1996) 517

Epitaxy

Self limiting growth on nominally oriented (111)A GaAs substrates in atomic layer epitaxy, J.-S. Lee, S. Iwai, H. Isshiki, T. Meguro, T. Sugano and Y. Aoyagi 103 (1996) 275

Mechanisms of suboxide growth and etching in atomic layer deposition of tantalum oxide from $TaCl_5$ and H_2O, J. Aarik, K. Kukli, A. Aidla and L. Pung 103 (1996) 331

Etching

Mechanisms of suboxide growth and etching in atomic layer deposition of tantalum oxide from $TaCl_5$ and H_2O, J. Aarik, K. Kukli, A. Aidla and L. Pung 103 (1996) 331

Field emission microscopy

The charge transfer between metal and an adsorbed atom observed by means of a scanning field emission microscope (SFEM), B. Barwinski and S. Sendecki 103 (1996) 525

Fluorescence

SPIX: a new technique for quantitative surface spectroscopy applied to S/InP(001), L. Rodríguez-Fernández, W.N. Lennard, H. Xia and G.R. Massoumi 103 (1996) 289

Gallium

Surfactant induced growth of thin gallium films on an insulating (sapphire) substrate, T. Lewowski, H. Otop and P. Wieczorek 103 (1996) 35

Gallium arsenide

SNMS characterization of ion irradiated GaAs surfaces, A. Scandurra, A. Licciardello, A. Torrisi, R. Weigert and O. Puglisi 103 (1996) 19

Sub-monolayer coverages of Be grown on GaAs(001)-c(4 × 4) and (2 × 4)-β by molecular beam epitaxy studied by reflectance anisotropy spectroscopy and reflection high-energy electron diffraction, K.C. Rose, D.A. Woolf, S.J. Morris, D.I. Westwood, R.H. Williams and W. Richter 103 (1996) 71

Self limiting growth on nominally oriented (111)A GaAs substrates in atomic layer epitaxy, J.-S. Lee, S. Iwai, H. Isshiki, T. Meguro, T. Sugano and Y. Aoyagi 103 (1996) 275

Gold

The interface between sputter-deposited gold thin films and ion-bombarded sapphire substrates, J.W. Park, A.J. Pedraza and W.R. Allen 103 (1996) 39

Interaction of mercury vapour with thin films of gold, C. Battistoni, E. Bemporad, A. Galdikas, S. Kačiulis, G. Mattogno, S. Mickevičius and V. Olevano 103 (1996) 107

XPS investigations of the reactivities of oxidized Zr/Nb interfaces formed by deposition on a gold substrate, Y.S. Li, K.C. Wong, P.C. Wong and K.A.R. Mitchell 103 (1996) 389

Molecular and atomic deuterium chemisorption on thin gold films at 78 K: an isotope effect, L. Stobiński 103 (1996) 503

Hall effect

The behavior of the surface charge density in $Hg_xCd_{1-x}Te$ epilayers due to hydrogenation and annealing, M.S. Han, J.H. Beak, Y.T. Oh, T.W. Kang, T.W. Kim and J.I. Choi 103 (1996) 183

Halogenides

Mechanisms of suboxide growth and etching in atomic layer deposition of tantalum oxide from $TaCl_5$ and H_2O, J. Aarik, K. Kukli, A. Aidla and L. Pung 103 (1996) 331

Hydrogen

Hydrogen adsorption induced surface reconstructions on Si(113) studied by LEED, X. Hu, K. Feng, Z. Lin and Y. Xing 103 (1996) 101

The behavior of the surface charge density in $Hg_xCd_{1-x}Te$ epilayers due to hydrogenation and annealing, M.S. Han, J.H. Beak, Y.T. Oh, T.W. Kang, T.W. Kim and J.I. Choi 103 (1996) 183

Indium phosphide

SPIX: a new technique for quantitative surface spectroscopy applied to S/InP(001), L. Rodríguez-Fernández, W.N. Lennard, H. Xia and G.R. Massoumi 103 (1996) 289

Infrared spectroscopy

On the intermediates of the acetic acid reactions on oxides: an IR study, Z.-F. Pei and V. Ponec 103 (1996) 171
The behavior of the surface charge density in $Hg_xCd_{1-x}Te$ epilayers due to hydrogenation and annealing, M.S. Han, J.H. Beak, Y.T. Oh, T.W. Kang, T.W. Kim and J.I. Choi 103 (1996) 183
N_2O decomposition over ZrO_2 – an in-situ DRIFT, TPR, TPD and XPS study, J. Lin, H.Y. Chen, L. Chen, K.L. Tan and H.C. Zeng 103 (1996) 307
Effect of hydrolysis groups in fluoro-alkyl silanes on water repellency of transparent two-layer hard-coatings, A. Hozumi and O. Takai 103 (1996) 431
The influence of modifying additions of La and Ce oxides on electronic state of surface atoms and ions of supported copper, A.N. Pestryakov and A.A. Davydov 103 (1996) 479

Interfaces

The interface between sputter-deposited gold thin films and ion-bombarded sapphire substrates, J.W. Park, A.J. Pedraza and W.R. Allen 103 (1996) 39
XPS investigations of the reactivities of oxidized Zr/Nb interfaces formed by deposition on a gold substrate, Y.S. Li, K.C. Wong, P.C. Wong and K.A.R. Mitchell 103 (1996) 389

Ion bombardment

SNMS characterization of ion irradiated GaAs surfaces, A. Scandurra, A. Licciardello, A. Torrisi, R. Weigert and O. Puglisi 103 (1996) 19
The interface between sputter-deposited gold thin films and ion-bombarded sapphire substrates, J.W. Park, A.J. Pedraza and W.R. Allen 103 (1996) 39
Thermal regrowth of Si(100) damaged by Ne, Ar, and Xe ion bombardment, G. Petõ and J. Kanski 103 (1996) 459

Ion implantation

N^+-implantation induced enhanced adhesion in WC_{1-x}/Ti–6Al–4V, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315

Ion scattering

N^+-implantation induced enhanced adhesion in WC_{1-x}/Ti–6Al–4V, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315

Iron

XPS/GIXS studies of thin oxide films formed on Fe–Cr alloys, T. Kosaka, S. Suzuki, H. Inoue, M. Saito, Y. Waseda and E. Matsubara 103 (1996) 55
An XPS/SEM/EDX study of the early oxidation stages of the Fe–19Cr–5Al(+Y) alumina-forming alloys, J. Jedliński, A. Glazkov, M. Konopka, G. Borchardt, E. Tscherkasova, M. Bronfin and M. Nocuń 103 (1996) 205
Nondestructive depth profiling of oxidized Fe–Cr alloy by the glancing-incidence and -takeoff X-ray fluorescence method, K. Tsuji and K. Hirokawa 103 (1996) 451
Effect of the surface segregation of chromium on oxidation of high-purity Fe–Cr alloys at room temperature, S. Suzuki, T. Kosaka, H. Inoue, M. Isshiki and Y. Waseda 103 (1996) 495

Langmuir–Blodgett structures

A novel structure observed on the phospholipid Langmuir–Blodgett bilayer by atomic force microscopy, Yuan Chunbo, Wu Ying, Yang Xiaomin, Lu Zuhong and Liu Juzheng 103 (1996) 531

Laser processing

Droplet formation on metallic surfaces during low-fluence laser irradiation, N. Seifert, G. Betz and W. Husinsky 103 (1996) 63
Preparation of 'near' homogeneous samples for the analysis of matrix-assisted laser desorption/ionisation processes, D.A. Allwood, I.K. Perera, J. Perkins, P.E. Dyer and G.A. Oldershaw 103 (1996) 231
On the theory of ps and sub-ps laser pulse interaction with metals. I. Surface temperature, B. Hüttner and G. Rohr 103 (1996) 269

Low energy electron diffraction

Hydrogen adsorption induced surface reconstructions on Si(113) studied by LEED, X. Hu, K. Feng, Z. Lin and Y. Xing 103 (1996) 101

A surface structure model for Si(337), X. Hu, E.G. Wang and Y. Xing 103 (1996) 217
Preparation of well-defined samples of AlPdMn quasicrystals for surface studies, C.J. Jenks, D.W. Delaney, T.E. Bloomer, S.-L. Chang, T.A. Lograsso, Z. Shen, C.-M. Zhang and P.A. Thiel 103 (1996) 485

Manganese

Preparation of well-defined samples of AlPdMn quasicrystals for surface studies, C.J. Jenks, D.W. Delaney, T.E. Bloomer, S.-L. Chang, T.A. Lograsso, Z. Shen, C.-M. Zhang and P.A. Thiel 103 (1996) 485

Mass spectroscopy

SNMS characterization of ion irradiated GaAs surfaces, A. Scandurra, A. Licciardello, A. Torrisi, R. Weigert and O. Puglisi 103 (1996) 19

Mercury

Interaction of mercury vapour with thin films of gold, C. Battistoni, E. Bemporad, A. Galdikas, S. Kačiulis, G. Mattogno, S. Mickevičius and V. Olevano 103 (1996) 107
The behavior of the surface charge density in $Hg_xCd_{1-x}Te$ epilayers due to hydrogenation and annealing, M.S. Han, J.H. Beak, Y.T. Oh, T.W. Kang, T.W. Kim and J.I. Choi 103 (1996) 183

Molecular beam epitaxy

Sub-monolayer coverages of Be grown on GaAs(001)-c(4 × 4) and (2 × 4)-β by molecular beam epitaxy studied by reflectance anisotropy spectroscopy and reflection high-energy electron diffraction, K.C. Rose, D.A. Woolf, S.J. Morris, D.I. Westwood, R.H. Williams and W. Richter 103 (1996) 71

Multilayers

Improvement of Cs-induced surface roughness for high depth resolution profiling of CdZnSe/ZnSe multilayer films, C. Takakuwa, M. Tomita, T. Hatanaka, I. Suzuki, G. Franco and H. Yamaguchi 103 (1996) 255
Sputtering induced roughening effects on ion beam profiling of multilayers, A. Galdikas, I.. Pranevičius and C. Templier 103 (1996) 471
Influence of saccharin on the structure and corrosion resistance of electrodeposited Cu/Ni multilayers, M. Troyon and L. Wang 103 (1996) 517

Neon

Thermal regrowth of Si(100) damaged by Ne, Ar, and Xe ion bombardment, G. Petõ and J. Kanski 103 (1996) 459

Nickel

Influence of saccharin on the structure and corrosion resistance of electrodeposited Cu/Ni multilayers, M. Troyon and L. Wang 103 (1996) 517

Niobium

XPS investigations of the reactivities of oxidized Zr/Nb interfaces formed by deposition on a gold substrate, Y.S. Li, K.C. Wong, P.C. Wong and K.A.R. Mitchell 103 (1996) 389

Nitrogen

N^+-implantation induced enhanced adhesion in WC_{1-x}/Ti–6Al–4V, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315

Nitrous oxide

N_2O decomposition over ZrO_2 – an in-situ DRIFT, TPR, TPD and XPS study, J. Lin, H.Y. Chen, L. Chen, K.L. Tan and H.C. Zeng 103 (1996) 307

Optical properties

Low-temperature photo-hydro-modification of II–VI and III–V semiconductors, A.M. Kamuz, P.F. Oleksenko, E.Yu. Ovsyannikov, F.F. Sizov and T.A. Dyachenko 103 (1996) 141
Effect of hydrolysis groups in fluoro-alkyl silanes on water repellency of transparent two-layer hard-coatings, A. Hozumi and O. Takai 103 (1996) 431

Organic substances

The analysis of surface-adsorbed organic molecules by alkali-assisted MIES combined with UPS(He I), J. Günster, D. Ochs, S. Dieckhoff and V. Kempter 103 (1996) 351

Oxidation

XPS investigations of the reactivities of oxidized Zr/Nb interfaces formed by deposition on a gold substrate, Y.S. Li, K.C. Wong, P.C. Wong and K.A.R. Mitchell 103 (1996) 389

Effect of the surface segregation of chromium on oxidation of high-purity Fe–Cr alloys at room temperature, S. Suzuki, T. Kosaka, H. Inoue, M. Isshiki and Y. Waseda 103 (1996) 495

Oxides

XPS/GIXS studies of thin oxide films formed on Fe–Cr alloys, T. Kosaka, S. Suzuki, H. Inoue, M. Saito, Y. Waseda and E. Matsubara 103 (1996) 55

On the intermediates of the acetic acid reactions on oxides: an IR study, Z.-F. Pei and V. Ponec 103 (1996) 171

N_2O decomposition over ZrO_2 – an in-situ DRIFT, TPR, TPD and XPS study, J. Lin, H.Y. Chen, L. Chen, K.L. Tan and H.C. Zeng 103 (1996) 307

Mechanisms of suboxide growth and etching in atomic layer deposition of tantalum oxide from $TaCl_5$ and H_2O, J. Aarik, K. Kukli, A. Aidla and L. Pung 103 (1996) 331

Palladium

Preparation of well-defined samples of AlPdMn quasicrystals for surface studies, C.J. Jenks, D.W. Delaney, T.E. Bloomer, S.-L. Chang, T.A. Lograsso, Z. Shen, C.-M. Zhang and P.A. Thiel 103 (1996) 485

Photochemistry

Photon energy dependence of synchrotron radiation induced growth suppression and initiation in Al chemical vapor deposition. II. Surface analysis by Auger electron spectroscopy, I. Nishiyama and F. Uesugi 103 (1996) 299

Photon induced modulation of surface barrier: investigation and application for a new image sensor, D.L. Vassilevski, M.S. Vinogradov and V.A. Borschak 103 (1996) 383

Photoelectron spectroscopy

XPS/GIXS studies of thin oxide films formed on Fe–Cr alloys, T. Kosaka, S. Suzuki, H. Inoue, M. Saito, Y. Waseda and E. Matsubara 103 (1996) 55

Influence of gas pressure on the plasma reaction on polyethersulphone, P. Gröning, M. Collaud-Coen, O.M. Küttel and L. Schlapbach 103 (1996) 79

Interaction of mercury vapour with thin films of gold, C. Battistoni, E. Bemporad, A. Galdikas, S. Kačiulis, G. Mattogno, S. Mickevičius and V. Olevano 103 (1996) 107

An XPS/SEM/EDX study of the early oxidation stages of the Fe–19Cr–5Al(+Y) alumina-forming alloys, J. Jedliński, A. Glazkov, M. Konopka, G. Borchardt, E. Tscherkasova, M. Bronfin and M. Nocuń 103 (1996) 205

Characterization of triazine derivatives on silicon wafers studied by photoelectron spectroscopy (XPS, UPS) and metastable impact electron spectroscopy (MIES), S. Dieckhoff, V. Schlett, W. Possart, O.-D. Hennemann, J. Günster and V. Kempter 103 (1996) 221

N_2O decomposition over ZrO_2 – an in-situ DRIFT, TPR, TPD and XPS study, J. Lin, H.Y. Chen, L. Chen, K.L. Tan and H.C. Zeng 103 (1996) 307

The analysis of surface-adsorbed organic molecules by alkali-assisted MIES combined with UPS(He I), J. Günster, D. Ochs, S. Dieckhoff and V. Kempter 103 (1996) 351

Influence of the rapid thermal annealing in vacuum on the XPS characteristics of thin SiO_2, E. Atanassova and A. Paskaleva 103 (1996) 359

XPS investigations of the reactivities of oxidized Zr/Nb interfaces formed by deposition on a gold substrate, Y.S. Li, K.C. Wong, P.C. Wong and K.A.R. Mitchell 103 (1996) 389

The validity of C1s charge referencing in the XPS of oxidised Al–Si alloys, C.R. Werrett, A.K. Bhattacharya and D.R. Pyke 103 (1996) 403

Photoemission studies on Cu(In, Ga)Se_2 thin films and related binary selenides, D. Schmid, M. Ruckh and H.W. Schock 103 (1996) 409

Effect of hydrolysis groups in fluoro-alkyl silanes on water repellency of transparent two-layer hard-coatings, A. Hozumi and O. Takai 103 (1996) 431

Thermal regrowth of Si(100) damaged by Ne, Ar, and Xe ion bombardment, G. Petõ and J. Kanski 103 (1996) 459

Effect of the surface segregation of chromium on oxidation of high-purity Fe–Cr alloys at room temperature, S. Suzuki, T. Kosaka, H. Inoue, M. Isshiki and Y. Waseda 103 (1996) 495

A study of SO_2 interaction with sodium carbonates by X-ray photoelectron spectroscopy, K. Stejskalová, I. Spirovová, E. Lippert, K. Mocek and Z. Bastl 103 (1996) 509

Photoemission

Activation of the Na_2KSb photocathode with Cs and O_2 at lowered temperatures, B. Erjavec 103 (1996) 343
Photoemission optogalvanic studies with copper as target electrode, K.C. Ajithprasad, V.P.N. Nampoori and C.P.G. Vallabhan 103 (1996) 465

Plasma processing

Investigation of the silicon-plasma silicon nitride interface with in situ transient photoconductivity measurements, J.R. Elmiger and M. Kunst 103 (1996) 11
AFM measurements of the topography and the roughness of ECR plasma treated polypropylene, M. Collaud Coen, G. Dietler, S. Kasas and P. Gröning 103 (1996) 27
Influence of gas pressure on the plasma reaction on polyethersulphone, P. Gröning, M. Collaud-Coen, O.M. Küttel and L. Schlapbach 103 (1996) 79

Platinum

Ab initio study of interaction between the OH hydroxyl and Pt_n ($n = 1-10$) clusters, W.-X. Xu, K.D. Schierbaum and W. Goepel 103 (1996) 279

Polymers

AFM measurements of the topography and the roughness of ECR plasma treated polypropylene, M. Collaud Coen, G. Dietler, S. Kasas and P. Gröning 103 (1996) 27
Influence of gas pressure on the plasma reaction on polyethersulphone, P. Gröning, M. Collaud-Coen, O.M. Küttel and L. Schlapbach 103 (1996) 79
Characterization of triazine derivatives on silicon wafers studied by photoelectron spectroscopy (XPS, UPS) and metastable impact electron spectroscopy (MIES), S. Dieckhoff, V. Schlett, W. Possart, O.-D. Hennemann, J. Günster and V. Kempter 103 (1996) 221

Raman scattering

Surface enhanced Raman scattering from a ternary catalyst $Cu/ZnO/Al_2O_3$ under reaction conditions, P. Petersen and W. Krasser 103 (1996) 91
Characterization of hard amorphous carbon films deposited with high-energy ion beams, R.G. Pregliasco, G. Zampieri, H. Huck, E.B. Halac, M.A.R. de Benyacar and R. Righini 103 (1996) 261

Rhodium

An AFM investigation of the deposition of nanometer-sized rhodium and copper clusters by spin coating, A. Partridge, S.L.G. Toussaint and C.F.J. Flipse 103 (1996) 127

Scanning tunneling microscopy

Structure of the B/Si(100) surface at low boron coverage studied by scanning tunnelling microscopy, M.A. Kulakov, Z. Zhang, A.V. Zotov, B. Bullemer and I. Eisele 103 (1996) 443

Secondary ion mass spectrometry

Interaction of mercury vapour with thin films of gold, C. Battistoni, E. Bemporad, A. Galdikas, S. Kačiulis, G. Mattogno, S. Mickevičius and V. Olevano 103 (1996) 107
Improvement of Cs-induced surface roughness for high depth resolution profiling of CdZnSe/ZnSe multilayer films, C. Takakuwa, M. Tomita, T. Hatanaka, I. Suzuki, G. Franco and H. Yamaguchi 103 (1996) 255
Characterization of hard amorphous carbon films deposited with high-energy ion beams, R.G. Pregliasco, G. Zampieri, H. Huck, E.B. Halac, M.A.R. de Benyacar and R. Righini 103 (1996) 261

Selenium

Improvement of Cs-induced surface roughness for high depth resolution profiling of CdZnSe/ZnSe multilayer films, C. Takakuwa, M. Tomita, T. Hatanaka, I. Suzuki, G. Franco and H. Yamaguchi 103 (1996) 255
Photoemission studies on $Cu(In, Ga)Se_2$ thin films and related binary selenides, D. Schmid, M. Ruckh and H.W. Schock 103 (1996) 409

Semiconductors

Low-temperature photo-hydro-modification of II–VI and III–V semiconductors, A.M. Kamuz, P.F. Oleksenko, E.Yu. Ovsyannikov, F.F. Sizov and T.A. Dyachenko 103 (1996) 141

Rhythmic chemical reaction of CO on the surface of a SnO_2 gas sensor, S. Nakata, Y. Kato, Y. Kaneda and K. Yoshikawa 103 (1996) 369

Silicon

Investigation of the silicon-plasma silicon nitride interface with in situ transient photoconductivity measurements, J.R. Elmiger and M. Kunst 103 (1996) 11
Hydrogen adsorption induced surface reconstructions on Si(113) studied by LEED, X. Hu, K. Feng, Z. Lin and Y. Xing 103 (1996) 101
A surface structure model for Si(337), X. Hu, E.G. Wang and Y. Xing 103 (1996) 217
Characterization of triazine derivatives on silicon wafers studied by photoelectron spectroscopy (XPS, UPS) and metastable impact electron spectroscopy (MIES), S. Dieckhoff, V. Schlett, W. Possart, O.-D. Hennemann, J. Günster and V. Kempter 103 (1996) 221
The analysis of surface-adsorbed organic molecules by alkali-assisted MIES combined with UPS(He I), J. Günster, D. Ochs, S. Dieckhoff and V. Kempter 103 (1996) 351
Point defect–dislocation loop behavior in Si with a $TiSi_2$ film, S.B. Herner, V. Krishnamoorthy and K.S. Jones 103 (1996) 377
The validity of C1s charge referencing in the XPS of oxidised Al–Si alloys, C.R. Werrett, A.K. Bhattacharya and D.R. Pyke 103 (1996) 403
Structure of the B/Si(100) surface at low boron coverage studied by scanning tunnelling microscopy, M.A. Kulakov, Z. Zhang, A.V. Zotov, B. Bullemer and I. Eisele 103 (1996) 443
Thermal regrowth of Si(100) damaged by Ne, Ar, and Xe ion bombardment, G. Petõ and J. Kanski 103 (1996) 459

Silicon nitride

Investigation of the silicon-plasma silicon nitride interface with in situ transient photoconductivity measurements, J.R. Elmiger and M. Kunst 103 (1996) 11

Silicon oxide

Influence of the rapid thermal annealing in vacuum on the XPS characteristics of thin SiO_2, E. Atanassova and A. Paskaleva 103 (1996) 359

Sputter deposition

The interface between sputter-deposited gold thin films and ion-bombarded sapphire substrates, J.W. Park, A.J. Pedraza and W.R. Allen 103 (1996) 39
N^+-implantation induced enhanced adhesion in WC_{1-x}/Ti–6Al–4V, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315

Sulphur

SPIX: a new technique for quantitative surface spectroscopy applied to S/InP(001), L. Rodríguez-Fernández, W.N. Lennard, H. Xia and G.R. Massoumi 103 (1996) 289

Sulphur dioxide

A study of SO_2 interaction with sodium carbonates by X-ray photoelectron spectroscopy, K. Stejskalová, I. Spirovová, E. Lippert, K. Mocek and Z. Bastl 103 (1996) 509

Surface structure

A surface structure model for Si(337), X. Hu, E.G. Wang and Y. Xing 103 (1996) 217

Tantalum

Mechanisms of suboxide growth and etching in atomic layer deposition of tantalum oxide from $TaCl_5$ and H_2O, J. Aarik, K. Kukli, A. Aidla and L. Pung 103 (1996) 331

Tellurium

The behavior of the surface charge density in $Hg_xCd_{1-x}Te$ epilayers due to hydrogenation and annealing, M.S. Han, J.H. Beak, Y.T. Oh, T.W. Kang, T.W. Kim and J.I. Choi 103 (1996) 183

Thermal desorption

N_2O decomposition over ZrO_2 – an in-situ DRIFT, TPR, TPD and XPS study, J. Lin, H.Y. Chen, L. Chen, K.L. Tan and H.C. Zeng 103 (1996) 307
Molecular and atomic deuterium chemisorption on thin gold films at 78 K: an isotope effect, L. Stobiński 103 (1996) 503

Thin films

Surfactant induced growth of thin gallium films on an insulating (sapphire) substrate, T. Lewowski, H. Otop and P. Wieczorek 103 (1996) 35
The interface between sputter-deposited gold thin films and ion-bombarded sapphire substrates, J.W. Park, A.J. Pedraza and W.R. Allen 103 (1996) 39
Electrodeposition and characterization of tin–zinc alloy coatings, O.A. Ashiru and J. Shirokoff 103 (1996) 159
Characterization of hard amorphous carbon films deposited with high-energy ion beams, R.G. Pregliasco, G. Zampieri, H. Huck, E.B. Halac, M.A.R. de Benyacar and R. Righini 103 (1996) 261
Photon energy dependence of synchrotron radiation induced growth suppression and initiation in Al chemical vapor deposition. II. Surface analysis by Auger electron spectroscopy, I. Nishiyama and F. Uesugi 103 (1996) 299
N^+-implantation induced enhanced adhesion in WC_{1-x}/Ti–6Al–4V, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315
Effect of hydrolysis groups in fluoro-alkyl silanes on water repellency of transparent two-layer hard-coatings, A. Hozumi and O. Takai 103 (1996) 431
Molecular and atomic deuterium chemisorption on thin gold films at 78 K: an isotope effect, L. Stobiński 103 (1996) 503

Tin

Electrodeposition and characterization of tin–zinc alloy coatings, O.A. Ashiru and J. Shirokoff 103 (1996) 159

Tin oxide

Rhythmic chemical reaction of CO on the surface of a SnO_2 gas sensor, S. Nakata, Y. Kato, Y. Kaneda and K. Yoshikawa 103 (1996) 369

Titanium

N^+-implantation induced enhanced adhesion in WC_{1-x}/Ti–6Al–4V, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315
Point defect–dislocation loop behavior in Si with a $TiSi_2$ film, S.B. Herner, V. Krishnamoorthy and K.S. Jones 103 (1996) 377

Tungsten

N^+-implantation induced enhanced adhesion in WC_{1-x}/Ti–6Al–4V, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315

Vanadium

N^+-implantation induced enhanced adhesion in WC_{1-x}/Ti–6Al–4V, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315

Water

Mechanisms of suboxide growth and etching in atomic layer deposition of tantalum oxide from $TaCl_5$ and H_2O, J. Aarik, K. Kukli, A. Aidla and L. Pung 103 (1996) 331

Xenon

Thermal regrowth of Si(100) damaged by Ne, Ar, and Xe ion bombardment, G. Petõ and J. Kanski 103 (1996) 459

X-ray diffraction

XPS/GIXS studies of thin oxide films formed on Fe–Cr alloys, T. Kosaka, S. Suzuki, H. Inoue, M. Saito, Y. Waseda and E. Matsubara 103 (1996) 55
N^+-implantation induced enhanced adhesion in WC_{1-x}/Ti–6Al–4V, N. Laidani, C. Dorigoni and A. Miotello 103 (1996) 315
The influence of modifying additions of La and Ce oxides on electronic state of surface atoms and ions of supported copper, A.N. Pestryakov and A.A. Davydov 103 (1996) 479

X-ray emission

SPIX: a new technique for quantitative surface spectroscopy applied to S/InP(001), L. Rodríguez-Fernández, W.N. Lennard, H. Xia and G.R. Massoumi 103 (1996) 289

X-ray fluorescence

Nondestructive depth profiling of oxidized Fe–Cr alloy by the glancing-incidence and -takeoff X-ray fluorescence method, K. Tsuji and K. Hirokawa 103 (1996) 451

X-ray scattering

XPS/GIXS studies of thin oxide films formed on Fe–Cr alloys, T. Kosaka, S. Suzuki, H. Inoue, M. Saito, Y. Waseda and E. Matsubara 103 (1996) 55

Zinc

Electrodeposition and characterization of tin–zinc alloy coatings, O.A. Ashiru and J. Shirokoff 103 (1996) 159

Improvement of Cs-induced surface roughness for high depth resolution profiling of CdZnSe/ZnSe multilayer films, C. Takakuwa, M. Tomita, T. Hatanaka, I. Suzuki, G. Franco and H. Yamaguchi 103 (1996) 255

Zinc oxide

Surface enhanced Raman scattering from a ternary catalyst $Cu/ZnO/Al_2O_3$ under reaction conditions, P. Petersen and W. Krasser 103 (1996) 91

Zirconium

N_2O decomposition over ZrO_2 – an in-situ DRIFT, TPR, TPD and XPS study, J. Lin, H.Y. Chen, L. Chen, K.L. Tan and H.C. Zeng 103 (1996) 307

XPS investigations of the reactivities of oxidized Zr/Nb interfaces formed by deposition on a gold substrate, Y.S. Li, K.C. Wong, P.C. Wong and K.A.R. Mitchell 103 (1996) 389
